

The DX Bulletin

September 19, 1979

Vol. 1 Issue 6

PROPAGATION FORECAST: September 23: High Normal; 24: High Normal; going to Disturbed; 25: Disturbed; 26/27: High Normal; 28/29: Above Normal. Thanks N4XX.

N6DX cancelled his stop at Niue, ZK2, and proceeded to Tonga early; his original plan was to be at A35 until about September 27. His 5W1CF operation netted a number of contacts on 6 Meters.

The American official expected on the air from CHAD is Jim Bullington, N4HX. No word on when he expects to be operational.

Japanese licensing proceeds apace: JL1 prefixes are exhausted and they have started on JM call signs.

VE3FXT is stationed in Thailand and has been heard operating from HS4AMA; he expects to be there two years and awaits his own HS call sign.

HS1WR will be visiting the US following his participation in the WARC; he will in NYC October 8, followed by Orlando, Washington, DC, Fargo, ND, Las Vegas, and finally Los Angeles October 23-31. If you would like to coordinate a visit at your local club, etc., talk to Fred Laun, HS1ABD on the air.

The following information on the recent CHINA activity will appear in Japan's premier amateur radio magazine:

"... JA6HOZ created a lot of excitement around the world, although very short-lived, on July 15, when he got on the air from Kwangtung, China for almost one hour on 20 Meters. There were a lot of conflicting stories floating around, including one in HR Report stating that the pile-up was so tremendous that the Chinese officials put the station off the air, which was not true. To set the record straight, here is the true story of the events as told by JA6HOZ, Yuji Shimada.

"He works for a large chemical company in Japan, and has travelled to business trips to China previous-

ly, and has had visitors from China in Japan on occasion. He has for some time wanted to have the opportunity to operate from China, and finally, through his Chinese business associates arranged for a 'five minute' demonstration of ham radio from the Canton city hall, to be conducted only while local government officials were in attendance.

"He put up a 20 Meter dipole at the Canton city hall, set up his rig, and three high-ranking officials came to see the demonstration. He went on the air on July 15 on 14120 at 0607Z and closed down at 0702Z. As soon as he went on the air, a jammer came on the frequency, began whistling at first, and then proceeded to play music. Yuji wanted to QSY of course, but he could not, as he was given permission to operate only on 14120 kHz. When the jammer briefly ceased operating now and then, he (Yuji) attempted to have a QSO, and succeeded in having a couple of JA QSOs. He managed to keep the attention of the city officials for almost a full hour.

"He did not receive written permission, as he desired, but only the oral permission from the local officials, and only for the single frequency, and only for the period that the officials were present.

"Yuji says we should not expect to hear him on from China again and, in his opinion, China is many, many years away from granting permission to its own citizens to operate ham radio, not to mention non-Chinese..."

THE DX BULLETIN gratefully acknowledges the help of Fred Ihara, JA1ADN, Editor of *CQ Ham Radio* (JARL) in finally setting the record straight in this matter.

1979 NEW ENGLAND DXCC MEETING: OCT. 6, 1979

All radio amateurs interested in DX are invited to attend the 30th NEDXCC Meeting and Banquet to be held at the Holiday Inn of Waltham, Mass., on Saturday, October 6, 1979. YLs and XYLs are, of course, most welcome. The evening program will be highlighted by New England's own roving DXer, Bill Poellnitz, K1MM, F0MM, FG0MM, FM0MM, KG4MM,

The DX Bulletin is a weekly publication devoted to news of interest to DXers worldwide. **The DX Bulletin** is affiliated with no other publication or organization, and is independently published by DXers, for DXers. Commercial advertising is accepted as a service to readers. **The DX Bulletin** actively solicits input and DX reports from all DXers. First Class mailing to US and VE amateurs and Airmail to all others is used. Yearly subscription rates are \$22 US and VE, \$30 all others. **The DX Bulletin** is printed and mailed from Houston, TX. Address all correspondence to: **The DX Bulletin**, 306 Vernon Avenue, Vernon, CT 06066 USA.

CE0ZM . . . etc. Bill will present a slide show and tell the exciting story of how he survived the 1S1DX expedition.

The afternoon program will begin at 2:30 pm in the Patio B area. It will include Roger Burt, N4ZC, who will give a slide show and talk on the first Desecheo operation which counted . . . KP4AM/D.

Hugh "Cass" Cassidy, WA6AUD, the recently retired editor of the *West Coast DX Bulletin*, will speak on that newsletter's glorious history.

There will be a \$2.00 fee to those attending the afternoon program only. A cocktail hour with a cash bar begins at 5 pm. The banquet will be served at 6 pm in the Terrace room with choice of Broiled Scrod (\$11.75) or London Broil (\$12.50).

Following K1MM's evening presentation on the Spratly assault, the program will conclude with short discussions by Don Search, W3AZD, ARRL Assistant Communications Manager for DXCC . . . Tony Berg, W1OT, Chairman of the ARRL's DX Advisory Committee, and finally John Sullivan, W1HHR, ARRL New England Division Director

Reservations are an ABSOLUTE MUST. Send your check and an SASE for return of your tickets to:

John J. Kenny (payee)
Woodman Rd., Chair Hill RFD 1
So. Hampton, NH
c/o Amesbury, Mass. 01913

Your check must be received no later than September 30!!!

Make your accomodation arrangements directly with the Waltham Holiday Inn, Totten Pond Road at the Winter St. Exit (#48) of Rt. 128. Their number is 617-890-3000.

Correction: In Issue #4 we should have said that the FCC will be closing their Laurel MD and Grand Island NE SPECIAL ENFORCEMENT FACILITIES, *not* monitoring stations. The goal is to have one of those facilities in each state, eventually.

The Australian group going to LORD HOWE island for the CQ WW Phone contest will be signing VK2ATZ/LH and will be on 160-6 Meters. They will work CW before the phone contest commences. QSLs will be handled by VK3OT. The operators will include VK3OT and VK2s, BYX, AOT, AAM, AKX, AGT, NDK, VFT and NUN.

We understand QSLing for the ZS6AF/T4 operation in the new Venda Republic will be handled by ZS4MG. His C/B address is S. Coosner, Box 325, Kroonstad 9500, OFS, Republic of South Africa.

In a June 11 memo, the chief of the International and Operations Division said the following to the chief of the FCC's Enforcement Division:

"It has come to our attention that the monitoring network has been issuing notices of violation to US amateurs communicating with amateurs in Thailand. Monitoring Branch was advised by Treaty Branch that the Commission no longer has a 'ban list' (sic) of countries with which amateur communications are prohibited. The 'ban list' has not existed since at least April 5, 1978."

Now that we have all breathed a sigh of relief, word comes from HS1ABD that he will be monitoring 3517 kHz each day at 1130Z.

The Northern California DX Foundation, Inc., has sponsored more DXpeditions than there's room to list here; some three dozen in the past five years. They are always happy to get donations of working equipment for deserving rare ones, plus you can become a member of the NCDXF. Five dollars gets you a handsome certificate. If you can contribute more to this 'Private Operating Foundation' write to P.O. Box 717, Oakland, CA 94604.

The DX Club of Puerto Rico has elected KP4AM President and Alex Mootoo, 3B8DA as their first honorary member. They have also approved a new award to be offered by the club, the All Caribbean Award for contacts with at least 25 DXCC countries in the Caribbean Sea area. Complete rules will be out soon.

From BOTSWANA, former A2CBX, now A22BX says the new A22 prefixes there became effective September 2. They were originally going to ride out the A2 callsigns through the end of 1979. A2CBW/A22BW has gone to Germany but will be back in Botswana in November.

It seems that VO6ONT is a special call to commemorate the 60th anniversary of the telephone in Newfoundland.

That TH8JM call was issued to the US Embassy in Bangui, Central African Republic, by the French government, when the C.A.R. was connected with France. The feelings of DXCC are that the French-issued license expired when they pulled out and TH8JM does not count.

More bad news . . . that fine TL8AZ operation is unknown by the person designated QSL manager. Ditto ST2MR. Ditto 3Y1VC on 40.

If you're in the DALLAS area check 147.87/.27 at 9 pm Dallas time on Wednesday evenings for a new DX information net.

BANDPASS: All reports for BANDPASS are invited, especially concerning QSOs with rare countries, rare CQ zones, unusual band openings and contacts on 160, 80, 40, and 6 meters. In the listings below, an asterisk (*) following the frequency indicates long path. E, C, and W stand for Eastern, Central and Western North America. Reports from amateurs outside North America are welcome and will be listed separately.

WA4JTI's POETRY CORNER

I woke this morning, so early at dawn,
 And looked at the paths, both short and long,
 The band was yet sleeping, so quiet and serene,
 It did not take long to survey the whole scene.
 A band that is silent is not unlike death,
 The stillness that lingers, just after the last breath.
 But one must have hope, for that is the key,
 That drives us all onward, DXers like me.
 I lolled in my chair, viewing my walls,
 Noting many exotic and far-away calls.
 They come and they go, in an endless procession,
 Stirring all the Deserving with a burning obsession.
 "Is it all worth it?" I whispered, wanting to know,
 To follow a crusade, so plodding and slow?
 To chase the exotic to the ends of the earth,
 To labor so seriously, forgoing all mirth.
 After pondering these thoughts, I started to tune,
 Surely the world would be awakening soon.
 Finding some chatter at the bottom of the band,
 I peaked my receiver with a quivering hand.
 Ah, yes!!! They were there, yet their signal not strong,
 But I knew it was Peking, and the path it was long.
 Such a pleasure to try to work one that you've missed,
 But alas! The grief one endures just to get on the list.

Send flowers to Dan McLean, WA4JTI.

The late spate of operations from 3B-land are welcome, especially in light of word that starting next year all licenses issued by the government of Mauritius will require one-year's residence; thus, 3B6 and 3B9 may become quite scarce.

TL8JM will be back in the US Nov.- Jan., then returns to the C.A.R. for two more years. He has an FT101 with bum receiver.

The September 14 issue of HR Report says the callsigns for WA8CR's Eq. Guinea operation will be 3C1HZ, 3C1EA and 3C1DX. After five or six days they will try for Annoban, no callsigns mentioned.

W2TDQ and N2KA netted 13,000 contacts during their recent operations from the Grecian islands. They will have QSLs from the printer in October so don't send more than one request.

Keep watching the publisher's notes in The DX Bulletin for information regarding your subscription, mailing times, etc. All of the initial subscribers, i.e., those paying through September, will expire at the end of September, 1980. That is to say, if you paid in August and missed a couple of issues, you are still going to get a full year's worth, or more.

Here are four interesting rumors to ponder: let the DX Bulletin know if you hear more . . .

1. OE6CA will be A6XJA/70 in South Yemen later this year.
 2. "Someone has a 3C0 license for November; apparently *not* referring to the EA8CR group.
 3. C5ABK will be in CR3 Portuguese Guinea in December.
 4. The FCC wants out of the Amateur Radio licensing business and guess who would like to take it over?
-

Tim Chin, EV2A/B took all his antennas down August 22 because of typhoon Judy and they are still down. Tim will put the aerals back up again in October. His call has been pirated lately.

Dave Schoen, N2KK/F0CGP sends the following tentative expedition schedule: Nov. 24, FR7; Dec. 1, FR7/T; Dec. 10, FH8; Dec. 15, FR7/G; Jan. 1 FR7/J; Jan. 10, 3B8; Jan. 12, 3B9; Jan. 20 5R8; Jan. 30; 60!!! Dave says K5CO and N5AU will be along, emphasizing low-band operation and plenty of CW. What more could DXers ask for?

THANKS to the following DXers who contributed to this issue of *THE DX BULLETIN*: KH6BZF, JA1ADN, CE0AE, WA4JTI, W4UG, W1RR, N4XX, HS1ABD, K1RM, K1XA, WA6CPP, KP4AM, K5OVC, K7ABV, W1NG, K2TQC, K5RW, K7KG, WD9IIC, W2HAZ, W1FJ, K7RDG, WD5DUD, W1VV, W7NCO, W9XX, N4MM, DJ9ZB, W3ODJ, W5OSJ, K0IFL, W0BW, WA1-JKK, K5BLV, K9UR, W7TVF, WA5KGW, AE6U, K8RD, N6BTY, W6ZUM, K9QVB, WA6TLA, WA6AJP, WWDXC, W6GO, K5RC, K5GA

Publisher's Note

Are you receiving your bulletin timely, and at your correct address? If not, complain! We do make mistakes (very few) and may miss you accidentally.

Here's how the weekly bulletin is gotten out. The bulletin is written, typeset, printed, collated, folded, labeled, stamped, sorted, mailed within four days first to last step. What is sometimes slowing us down is the time in the mail, which we are experimenting with. WE are getting there — The Best in DX!

Not sure whether you want to subscribe? Request a free later issue and watch our progress as we grow. Our aim is the best in DX info, weekly, and fast to you.
